

SANITECH

P R O L I N E

Designed for optimum performance in Phoenix water conditions, the Sanitech Whole House Water System utilizes premium quality components to achieve quality results. By eliminating hard water problems, and a variety of chemicals and contaminants, this innovative product refines the lifeblood of your home. From the laundry room to the kitchen, and the bathroom to garage, Sanitech Pro-Line enhances the quality of life, through the quality of water.

Quality Water...

Quality Life

Innovation:

- Bio-Guard™ carbon filtration media, featuring Agion® anti-microbial technology.
- High cross-link softening resin, prevents chlorine oxidation, and breakdown.
- Direct drive piston design, ensures precision valve dynamics, and reduces wear.
- Fewer moving parts, provide higher flow rates and proven reliability.

Performance:

- Superior filtration & softening matrix, provides quality water for everyday use.
- 1” – 1 ¼ “ electronic fully programmable on-demand valve, with built in diagnostics.
- Soft water regeneration, ensures efficient cleaning, and better resin effectiveness.
- Dry Brining, reduces salt bridging.
- NSF/WQA certified components.

Efficiency:

- Ecoflow technology, requires 30% less water for regeneration cycles. Promotes greater lift and media expansion.
- 12V solid state electronics, with non-volatile memory.
- Adjustable reserve capacity, optimizes regeneration frequency, saving precious water.
